

Attachment B:***Scheduling Coordinator Certification of External Imports of
Non-Regulation Ancillary Services***

In accordance with the ISO Tariff and Protocols, [name of SC], hereby certifies its ability to deliver Spinning Reserve, Non-Spinning Reserve, and/or Replacement Reserve services to the point(s) of interchange with the ISO Control Area in the amounts (individually or in aggregate) equal to or less than the maximum scheduling capability, in each Trading Day, indicated in the following table. With this certification, the Scheduling Coordinator recognizes the ISO Tariff and Protocols require the Scheduling Coordinator to respond to ISO dispatch instructions ordering the delivery of Energy from the self-provided or bid external imports of Ancillary Services at any time during the operating hour (i.e., not necessarily on the hour or at the half-hour). The Scheduling Coordinator further certifies that any and all Ancillary Services bid or self-provided as external imports of System Resources will be delivered over non-interruptible, non-recallable transmission rights, from the source of the Ancillary Services to the point of interchange with the ISO Control Area.

Subsequent to the initial filing of this certification with the ISO, any prospective changes made by Scheduling Coordinator may be filed with your ISO Client Relations Representative, and they will acknowledge the receipt of such changes and indicate the date on which such changes will become effective. Such change(s) will be made by the ISO as soon as practicable.

This document ____ (does) ____ (does not) contain changes to previously effective certification.
